

EdgePOS

POS

EdgePOS is a user-friendly, flexible, and a comprehensive retail management software solution for retailers. EdgePOS provides complete power to the retailers to complete transactions quickly in the most efficient manner.

Retail management is dominated by a large number of transactions, both externally and internally with suppliers and customers. The key to success lies in the effective management of all these transactions and keeping a track of all the aspects of the business at one place. A smart retailer would pick the right store management software rather than just a simple billing solution. SourceEdge has developed a complete retail management software solution EdgePOS which is most suited for a wide variety of application areas

Modules of EdgePOS

This is a complete retail management software solution for retailers and is bundled with back-office operations on finance, inventory, purchase, CRM, warehouse, etc. This point of sale software is most suited for billing in a wide range of application areas such as hotels, restaurants, grocery, cosmetics, furniture, bakery, etc. Some of the key modules include:
